

# New Heads Professionally Assembled and Tested. Designed with Valve Trains to Suit Your Budget and Riding Style.

**OE package:** 100% Genuine original equipment valves, springs, retainers, spring locators, keepers, viton seals. If this package is not listed for your bike or want a more durable valve train, use the FH package.

**FH Titanium package:** Fastheads upgrades are proven more durable than OE. Fixes inherent problems with OE valve trains as needed. Replaces OE valves with CrN DLC PVD hard surface Del West Titanium valves, factory OE springs superceded or upgraded if needed. Retains factory engineered valve and spring weights. No power loss or possible valve float as compared to heavy stainless steel valve conversions. Maintains stock or better power over OE.

**SS Stainless valve package:** Reduces overall cost. Suggested for trail riding and lower RPM use. Converts original titanium valve train to stainless steel "SS". Wears better than some OE Ti valves. Heavy duty springs are included to control the 70% heavier SS valves. Reduces power by 5% to 10%.

**KW SS Package:** Kibblewhite, "KPMI" Black Diamond Stainless valves combined with their heavy duty dual spring kit with titanium retainers and hardened spring locators. Can be used at higher RPM with less chance of valve float. The original fix to OE premature Ti valve wear. Reduces power by 5% to 10%.

**FHPRO Race Package:** Maximum power, pro level, requires more frequent servicing and parts replacement. Custom built to suite your racing needs. Porting, cams, oversize valves, DLC lifters, spring kits etc. We suggest the standard FH package for 95% of the racers. Call for custom race head pricing.
